# Press Release

## New laser safety eyewear brochure now available

**Edinburgh, 16 November 2011**

Photonic Solutions' new LaserShield laser safety eyewear brochure includes comprehensive information on the full range of laser safety goggles that we hold in stock at our premises in Edinburgh.

Photonic Solutions supplies EN207:2010 certified laser safety eyewear for medical, military, aviation, scientific and industrial applications. These frames carry a lifetime guarantee and are designed to be lightweight, comfortable and are therefore easy to wear - an important consideration for users who may spend long hours wearing them.

Our new laser safety eyewear range now includes the new FG1 mineral glass filter from NoIR. With this glass filter NoIR can now offer customers the choice of even higher protection levels combined with 75% VLT, in a robust and durable frame style. The FG1 glass filter offers high levels of protection along with excellent thermal stability over the wavelength range 850nm to 10,600nm.

All our laser safety glasses are held in stock at our premises in Edinburgh and are available for on-line ordering with next day delivery through our webshop: <http://www.photonicshop.co.uk>.

You can download a copy of this brochure from our website [www.photronicsolutions.co.uk](http://www.photronicsolutions.co.uk). If you would like information on the full range of laser safety eyewear available from Photonic Solutions then please contact us at [sales@photronicsolutions.co.uk](mailto:sales@photronicsolutions.co.uk). ~ENDS~

**For Immediate Release**
