

# Emerald Engine 516 nm / 1032 nm

## Green Pump Laser

- Emerald Engine is an Yb-fiber based pump laser with a pulse width of 2 ps, alternatively 6 ps. Emerald Engine Duo is equipped with a frequency doubling unit. Two beams are available: a frequency-doubled beam with 516 nm (> 3 W) and the undepleted fundamental beam with 1032 nm (> 0.75 W). The two beams are intrinsically synchronized and jitter-free.
- A high-power version with an output power of > 6 W for the frequency doubled beam and > 3 W for the fundamental beam is also available.

- Frequency doubled Yb-fiber laser
- Green and IR beam are intrinsically synchronized and jitter-free
- Offers pulses as short as 2 ps with a spectral width of only 10 cm<sup>-1</sup>
- Laser repetition rate stabilized by cooled base plate
- Windows based control software included
- Sync-out signal
