All NoIR LaserShields are hard-coated for scratch protection.
Quality and specifications guaranteed.

NoIR—an independent manufacturer and eye-protection specialist—has been providing medical and industrial safety eyewear since 1973 to a global community of laser manufacturers, medical and industrial UV/blue light system manufacturers, hospitals, clinicians, and pharmaceutical and telecommunication companies. Custom frequency absorption, alignment, UV/Blue light curing, photodynamic therapy, and enhancement filters are available. LaserShields® are available in contemporary styles for those who wear prescription glasses as well as those who do not. Patient, post-treatment and pediatric filters are also available. NoIR welcomes new product development projects.
